8 AM—12 PM

### SATURDAY

CLOSED

### SUNDAY

CLOSED

## EYL

\* Faculty, students, and staff are welcome to come by the Library to pick up a free copy of the Summer 2015 issue of the NIH MedlinePlus magazine.

\* For departments wishing to print in the Library, we ask that you set up printing arrangements in advance. To get a card for printing/copying for your department, please contact the Library Administration Office at (210)567-2408.

## AccessMedicine and AccessSurgery Upgrades

The UT Health Science Center Library is pleased to report a recent upgrade to our McGraw-Hill database subscriptions. AccessMedicine and AccessSurgery now have unlimited access for Health Science Center users. Previously, only a limited number of users could be signed on to these databases at any one time. In addition, the Access Neurology Collection will be available for a one year trial period.

A sample of titles in the Neurology Collection include:

Adams and Victor's Principles of Neurology, 10th edition

Clinical Neuroanatomy, 27th edition

Clinical Neurology, 2nd edition

DeMyer's The Neurologic Examination: A Programmed Text, 6th edition

Principles of Neural Science, 5th edition

Coming in the September newsletter will be information on the AccessMedicine app.

## New England Journal of Medicine Backfiles Now Available

The Briscoe Library now has access to the complete run of New England Journal of Medicine. Access for NEJM begins with 1928 and previous titles range from 1812-1927. This backfile collection was purchased through our consortial partnership with the University of Texas System using Academic Library Collection Enhancement Program (ALCEP) funds allocated by the UT System Board of Regents for one-time collection purchases.

## National Immunization Awareness Month

August is National Immunization Awareness Month (#NIAM15). The purpose of this observance is to highlight the importance of immunizations, one of the top 10 public health accomplishments of the 20th century, according to the Centers for Disease Control and Prevention (CDC).

While immunizations have significantly reduced the number of many serious infectious diseases, vaccination rates for some diseases are not meeting national public health goals. Remember that immunizations aren't just for children. They are needed throughout our lifetime.

Click below to view the recommended immunizations schedules for:
