Briscoe Library Staff Welcomes Karen Barton

The UT Health Science Center Libraries welcome Karen Barton as the new Liaison to the School of Health Professions (SHP) and Community Engagement Librarian. Karen comes to the UTHSCSA Briscoe Library from the San Antonio Public Library where as a Teen Services Librarian she has been involved with community outreach programming. Karen graduated from the University of Illinois at Urbana-Champaign in 2013 with an M.S. in Library and Information Science and a certificate in Community Informatics. Karen also holds a B.A. in Communication and Media Production.

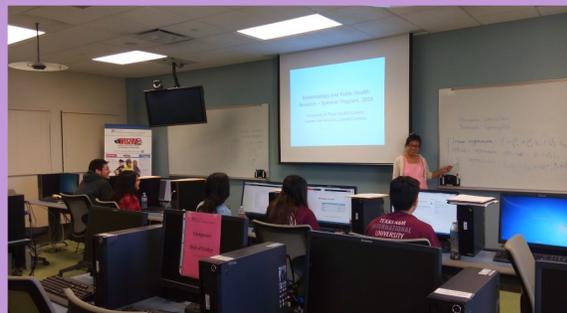

Karen will work with faculty in the SHP to plan and develop curriculum-integrated content and serve as a single point of contact for library services. Karen will also work on campus and community engagement initiatives that promote library resources and services in support of education, research, and community health.

As a student, volunteer, and librarian, Karen has an impressive background with a wide variety of program experience. Selected as a Community Ambassador at the Urbana Free Library, she collaborated with librarians, school and community partners to provide digital media and other programming for a new afterschool space. Through the program she encouraged student invention, creativity, and autonomy through audio and video production, 3-D printing, and other STEAM-focused projects. We look forward to having Karen as a member of our Library team and introducing her to our wider campus and community.

Library Supports Mini-Fellowship

The Library was pleased to provide support for the Mini-Fellowship for Epidemiology and Public Health Research that took place during the month of June. Planned in cooperation between the Laredo Regional Campus and Texas A&M International University (TAMIU), the program was attended by 5 area high school students. Statistical software, SAS, was installed on 5 desktops in the Library computer lab and 3 book titles were placed on reserve in support of the program.
